July 10, 2020

Dear Customer:

You are receiving this letter because you purchase water from SUEZ on a regular or emergency basis. We would like to inform you that our compliance testing for the past two compliance periods, from July 2019 through June 2020, showed our lead level to be below the federal standard.

We have made changes to our Corrosion Control Treatment process within the guidelines of our NJDEP Permit:

- On 7/20/2020, we will be increasing the Zinc Orthophosphate dosage from 1.5 mg/l to 1.75 mg/l.
- The pH will remain at 8.0 s.u.

SUEZ will continually monitor the impact of these changes to enhance our Corrosion Control Treatment process through our strategically-located process monitoring stations. Based on the data collected from these stations, we may make further enhancements and will advise you if and when we do so.

If you have any questions, please call me at 201-931-9384. Thank you very much.

Sincerely,

A handwritten signature in blue ink, appearing to read "Christopher Sall".
